### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

1. Claims 10, 16 and 19 are objected to because of the following informalities:

- Claim 10, line 1, change "image-transfer" to -- image-forming --.
- Claim 16, line 2, change "a" to -- the --.
- Claim 19, lines 5 and 10, change "image-forming" to -- printer --.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6, 9, 10 and 12-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Guddanti [US 2003/0184785].

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Guddanti discloses a printer device [paragraph 0010] having print media trays [paragraph 0021], a bar code reader located external to the printer for sensing information encoded in a bar

Art Unit: 2852

code located on an outer surface of an image media package [Fig. 1; paragraphs 0019, 0020], memory [paragraph 0022] including ROM [106] and RAM [108], and a controller [paragraphs 0023, 0024] for modifying printer settings based on the sensed bar code information; wherein the printer settings comprising information regarding a media weight, surface smoothness etc. [paragraph 0025].

Regarding claims 1-6, 9, 10 and 12, the claimed method steps are inherent from the product structures.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 7, 8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guddanti in view of Prenn [WO 01/81093].

Guddanti, as discussed above, disclose the claimed invention except for updating the

Art Unit: 2852

printer settings upon activation or resetting of the printer or when the media tray is opened.

Prenn, an applicant's cited prior art, discloses a printer comprising updating the printer settings upon activation or resetting of the printer or when the media tray is opened [Claims 7, 8].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the printer disclosed by Guddanti having updating the printer settings upon activation or resetting of the printer or when the media tray is opened as taught by Prenn for the purpose of reducing the likelihood of an error resulting from having the wrong size or type of the image media in the media tray.
